Projects

Hospital Project / HTML5, CSS3, BOOTSTRAP

- Developed a responsive Hospital Website using HTML5 and Bootstrap, enabling seamless appointment booking, patient management, and real-time tracking of medical services.
- Designed an intuitive user interface using HTML5 and Bootstrap, enhancing user experience through easy navigation of appointment bookings, patient records, and billing management.
- Implemented a robust data management system to efficiently store and retrieve patient information while ensuring high data integrity and confidentiality.
- Integrated advanced search and filter functionalities, enabling users to quickly find and select doctors, departments, and appointment slots based on their preferences.

Solution Cone / HTML5, CSS3.

- Developed a Daily Expense Tracker Web Application using HTML and CSS, providing a clean and user-friendly interface for tracking and managing daily expenses.
- Designed and implemented a robust database system using SQL to efficiently store and retrieve user transactions, with optimized queries for fast and reliable data access.
- Streamlined the expense entry and tracking process by enabling users to categorize expenses and access detailed reports for improved financial management.
- Integrated data validation and error handling to ensure data integrity and prevent inconsistencies in expense tracking.
